

Uni Design Jewellery, Mumbai-Maharashtra, India - 2023

With over 3000+ employees Uni Design Jewellery Pvt. Ltd. has manufacturing units in Mumbai, Gujarat, Europe and USA. The company manufactures modern art jewelry for various brands round the globe.

Summer Intern under Mr. Vijayanand Aroor, CEO.

During my tenure as a trainee under Mr. Vijayanand Sir, I learnt the entire jewelry making process and how it applies to business, marketing, and engineering. I learned technical proficiency, quality assurance, and market research.. From their morning yoga mediation to lunch hours, I got an opportunity to follow through the entire process and learn invaluable skills of analyzing market trends in terms of customer preferences, learning the operation of 3-D printing machines and usage of CAD software to make input designs for 3-D printer and to have a prior outlook on the final outcome to ensure we match the customer preferences.

The flowchart below depicts the continuance of the piece through different sectors.

Lastly, I want to share my experience at UNI Design. I'm grateful to the team for this insightful opportunity. I learned about processes like electroplating and 3-D printing, which I previously only studied in grade 10. I was impressed by the skill involved in collecting gold dust from tools and employees, promoting efficiency by reusing gold that would otherwise be wasted, thus enhancing sustainability.
